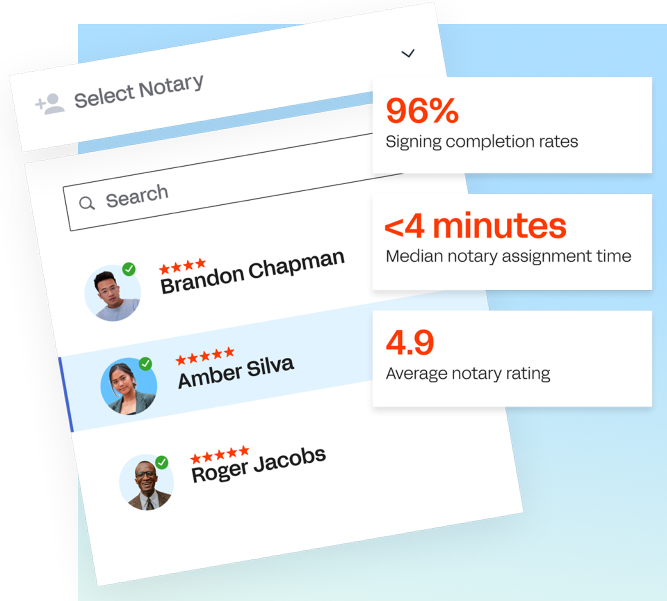
snapdocs

Notary Connect

Easily manage mobile and remote online notarizations (RON) in one place with the flexibility, visibility, and control you need.



Who it's For

Title companies

Why juggle vendors when you can seamlessly manage your mobile and RON orders through a unified workflow. Hand-off the whole process to our white-glove team with Snapdocs Premium, or use Snapdocs Flex to self-serve and schedule your in-house notaries, your preferred contractors, or our nationwide network.

Signing services

With mobile and RON on one platform and predictable, transparent pricing, you're in control. Snapdocs Flex automates your manual tasks and ensures data compliance so you can focus on delivering the best experience for your customers.

Other businesses

Not in real estate? From wealth platforms and estate planning to trust-and-will providers, have confidence in the quality of the notary representing your business. Find a notary that meets your requirements with either self-serve Flex or white-glove Premium.

Plans to Fit Every Business

FLEX

Companies that want to manage notary workflows with full control, visibility, and flexibility.

- Self-serve technology automates notary assignment, scheduling, and document sharing.
- Manage communication, signing quality, and issue resolution.
- Curate your notary selection choosing from your own notaries or a credentialed notary from the Snapdocs network.

PREMIUM

Companies that want to outsource notary scheduling and management with white-glove service from Snapdocs.

- Our team oversees every order, anticipating needs and ensuring a seamless, efficient signing.
- Proactively solve issues - including error resolution, document guidance, and Q&A.
- AI-powered Quality Control review on 100% of orders.

Why Snapdocs

Mobile and RON in a single workflow
Mobile notary and RON in a single experience. Consolidate vendors, eliminate duplicate workflows, and give your team one place to manage every signing type.

Real-estate-trained notaries
Every Snapdocs notary is trained for real estate transactions. That means fewer errors, better borrower experiences, and lower re-sign rates on every order.

Curated notary selection
Filter by experience, quality rating, certifications, and geography. Favorite notaries you trust and exclude ones you do not. Or, assign your own in-house notary. You control who represents your company at the signing table.

Flat, predictable pricing
Many RON providers charge per-stamp or per-signer, making costs unpredictable and hard to communicate to borrowers. Snapdocs charges a flat fee so your team always knows what a signing costs.

Specialized Support
When your team has a question, they talk to people who know real estate. That difference shows up in resolution time and in borrower experience.

Audit-ready by default
RON transactions run through MISMO-certified workflows with identity verification (IDV, KBA, and biometrics), while every Notary Connect order is protected by 2FA, data encryption, and complete communication logs. This means fewer compliance gaps, faster audits, and a clear paper trail on every signing.

How it works

Order is created in the platform or via TPS integration

Mobile or RON notary is selected based on your preferences

Notary and signer coordinate and confirm appointment details

Status and communication are tracked in real time

Signing is completed (in-person or online)

Completed records are stored securely for compliance and audit
