

Efficient, error-free eClosings without leaving your LOS

LOS INTEGRATION

Encompass Partner Connect™ (EPC) by ICE Mortgage Technology®

Snapdocs seamlessly integrates with the latest Encompass Partner Connect (EPC) platform, allowing lenders to execute digital closings in one centralized workflow for a more efficient and transparent experience for all parties.

Lenders can initiate the closing process, digitally send data and documents, monitor the progress of each transaction, and receive real-time status—through a secure data connection.

Once the closing package is complete, Snapdocs automatically classifies and sorts all closing documents into the correct Encompass eFolders. It's simple to get started and Snapdocs offers a hand-in-hand partnership, from start to scale.

Integration Features

Snapdocs' integration with Encompass Partner Connect (EPC) allows lenders to manage all types of closings in one efficient workflow.

| | | |
|--|---|---|
|  <p>Create closings directly within Encompass Closing teams can easily create orders, monitor the progress of each transaction, and receive real-time status updates when closing documents are completed.</p> |  <p>Seamlessly redraw documents Automatic redraws from Encompass minimize the time and effort spent replacing closing documents. Isolate and redraw individual pages, without the need to replace the full package.</p> |  <p>Instantly receive closing packages back in your LOS Once the closing package is complete and error-free, Snapdocs automatically classifies and sorts all closing documents into their correct Encompass eFolders.</p> |
|  <p>Simple partner management Manage Snapdocs in Encompass Web, where all your partners and services live.</p> |  <p>Modern user interface Utilize ICE's latest web based doc ordering flow for the most seamless experience.</p> |  <p>Encompass web compatible Enable your transition to Encompass Web with a partner that is already utilizing the most up-to-date ICE technology.</p> |

Our impact, in their words

“Snapdocs was the only vendor I could throw an entire Encompass document set. They’ll convert them, figure out which ones are wet and which ones are electronic. Then, electronically tag everything and do it very quickly.”

Jeff Henkel | VP, Closing Fulfillment

“The post-closing piece is much more efficient. The integration pushes the signed closing packets directly back into our Encompass eFolder within 10 to 15 minutes of the title company uploading it. Now, that’s a tremendous efficiency. We can literally have a loan closing at 9 AM and have a fully signed package back in our eFolder by noon.”

Todd Burton | Director of Process Development

“The biggest selling points, besides customer service, that separated Snapdocs from other providers were (i) the efficiencies we could gain by closing all loans through one platform, and (ii) the seamless integration with Encompass® by ICE Mortgage Technology®. When we switched to Snapdocs, our entire closing process became standardized for all closing types. Clicking that button within Encompass®, sending it through Snapdocs, and then letting the closing type dictate the process, gave us uniformity in the closing space.”

Ian DiFazio | Director of Closing and Post-Closing
