snapdocs | LENDER

A fully connected digital closing experience inside Optimus

LOS INTEGRATION

Lender Optimus

Snapdocs brings a purpose-built digital closing experience directly into Lender's unified CRM, POS, and LOS platform.

Through a secure, real-time integration, lenders can initiate and manage wet, hybrid, and fully electronic closings within the same platform they use to manage the loan lifecycle. Documents and data stay synchronized, completed packages are returned efficiently, and teams maintain clear visibility throughout each transaction. This reduces manual work, minimizes errors, and accelerates closings

Together, Snapdocs and Optimus replace fragmented processes with a connected, scalable experience that helps lenders move seamlessly from application through closing, supported by hands-on implementation and partnership.

Snapdocs eClosing

Close more loans, faster with the industry's leading digital closing platform.

- ✓ Designed for future-facing lenders: Build and grow a successful eClosing strategy, trusted by hundreds of lenders achieving adoption 3X the industry average.
- ✓ AI-powered efficiency: Automate workflows that reduce manual, time consuming tasks to save you time and money.
- ✓ Real-time transparency: Gain visibility into the status of the closing for your team and all stakeholders.
- ✓ Unmatched network adoption: Access the industry's most connected ecosystem of settlement partners, notaries, investors, and tech providers.
- ✓ Higher quality assets: Instantly verify that critical-to-fund documents are present and accurate with Funding QC, catching errors before selling the loan.

Integration Features

Snapdocs' LOS integrations allow lenders to effectively manage all types of closing with the following functionality:

Initiate and manage closings	Send data & documents	Receive real-time status updates	Collect signed documents	Support for partial and full redraws
