

Two industry leading solutions. One streamlined signing workflow.

Access Snapdocs Notary Connect through Qualia Marketplace and tap into a network of 140K+ notaries to help keep mobile and remote online notarization (RON) signings moving with less manual coordination.

Snapdocs & Qualia Marketplace: Keep every signing on track

Extend the closing workflow through signing

Qualia and Snapdocs connect the signing workflow with the people, technology and support needed to carry it through.

Keep the process connected through execution

The work your team has already organized in Qualia carries forward into the signing, so notarization does not become a separate process to manage.

Reduce the handoffs around signing

Move from closing preparation to signing with fewer manual steps between your title team, the notary, and completed documents.

Protect the momentum of the closing

Maintain visibility from order through completion across both RON and mobile signings.

Notary support for the way your team works

PREMIUM

Companies that want to outsource notary scheduling and management with white-glove service from Snapdocs.

- ✓ Our team oversees every order, anticipating needs and ensuring a seamless, efficient signing.
- ✓ Proactively solve issues - including error resolution, document guidance, and Q&A.

**Premium is available without a contract. Sign a contract to get discounted pricing and provide customized QC guidance*

FLEX

Companies that want to manage notary workflows with full control, visibility, and flexibility.

- ✓ Self-serve technology automates notary assignment, scheduling, and document sharing.
- ✓ Manage communication, signing quality, and issue resolution.
- ✓ Curate your notary selection choosing from your own notaries or a credentialed notary from the Snapdocs network.

**Flex requires a contract with us before you can use*

Why Title Teams Choose Snapdocs

✓ A nationwide notary network

Every Snapdocs notary is independently qualified and real-estate trained for real estate transactions. That means fewer errors, better borrower experiences, and lower re-sign rates on every order.

✓ Quality checks before the work comes back to your team

Marketplace Premium orders are reviewed for scan quality, completeness, and errors on recordable documents, helping surface common issues before they create more downstream risks.

✓ Visibility from order to completion

Follow mobile and remote online notarization (RON) signings progress and communication without having to chase updates across disconnected systems.

✓ Audit-ready by default

RON transactions run through MISMO-certified workflows with identity verification (IDV, KBA, and biometrics), while every Notary Connect order is protected by 2FA, data encryption, and complete communication logs. This means fewer compliance gaps, faster audits, and a clear paper trail on every signing.

From Qualia to Completed Signing

Select Snapdocs in Qualia Marketplace

Choose Snapdocs as your notary services provider and submit the signing order without leaving Qualia.

Follow progress in your existing workflow

Documents, communications, and order statuses move between Qualia and Snapdocs automatically. You do not have to leave Qualia for updates on your notary order.

Snapdocs coordinates the signing

Depending on your Snapdocs solution, scheduling and assignment are either managed by Snapdocs Premium or controlled by your team through Snapdocs Flex.

Keep the transactions moving through completion

Once the signing is completed and the information your teams needs flows back into the workflow.

Billing note: Qualia requires that notary services be paid for on delivery
