

Funding Quality Control

Accelerate funding with exception-based Quality Control.

99%+

accuracy on missing pages & signing fields*

Less than 50%

of packages required manual review

80%

less time spent reviewing exceptions

\$25+

savings per loan

Overview

Funding Quality Control (FQC) uses AI-powered automation to review critical-to-fund documents immediately after closing. Within minutes of scanback upload, FQC flags potential issues so teams focus on exceptions, move clean files toward funding faster, and reduce delays for borrowers.

Turn faster QC into faster funding

Focus reviews on flagged exceptions to move clean packages toward funding sooner and reduce borrower rework.

 Confirm the right package Match borrower name and loan number.	 Catch signing gaps early Find missing pages, signatures, initials, dates, and notary stamps.	 Focus review where needed Surface handwritten dates and key signatures for rapid validation.	 Resolve with less back-and-forth Notify lender and settlement and re-QC corrected files.	 Keep funding visible Track QC Passed, Errors Confirmed, and Authorized to Fund statuses.

CASE STUDY

One lender saved 900+ hours of closer time - about 3.5 hours per closer each week

15+ minutes saved per loan, with fewer re-signing, shipping, overtime, and downstream correction costs.
Turn faster QC into faster funding.

Ask us to model the time, capacity, and cost impact for your funding workflow.

**Accuracy and savings are based on customer benchmarks and may vary by lender volume, package scope, document configuration, and workflow.*

How it Works

Within 5 minutes of upload, FQC checks the critical-to-fund package, routes actionable exceptions, and keeps status visible through funding.

- Upload**
Settlement uploads scanbacks after closing.
- QC Check**
FQC reviews critical-to-fund documents and sends results to lender and settlement within 2–5 minutes.
- Resolve**
Lender and settlement review actionable issues; corrected files are re-QC'd.
- Authorize**
QC status and audit history stay visible through funding authorization.
